

Exfoliating Products

Exfoliation is an important addition to the daily beauty ritual. By ridding the top layer of dead skin cells, younger, more radiant skin can shine though. By allowing this process to occur, the appearance of lines and wrinkles may also decrease. This process also prepares skin for moisturizer to be applied by opening the pores, thus maximizing moisturization.

Formulator Sample Shop offers a variety of exfoliating products including both physical and chemical exfoliators, as well as enzymes. Exfoliators are great for both skin and body formulations such as scrubs, masks, and cleansers.
