

CO2llageneer®

Code: FSSB30054
INCI Name: Helianthus Annuus (Sunflower) Seed Oil & Lupinus Albus Seed Extract
CAS #: 84776-03-4 & 84082-55-3
EINECS #: 232-273-9 & 282-001-8

Temperature Stability	Stable up to 80°C
Suggested Use Level	0.5 – 2.0%
Solubility	Soluble in Mineral Oil, Vegetable Oil, Silicone
Formulation Guidelines	CO2llageneer® should be added at temperatures ≤75-80°C just before the emulsion in order to limit the heating time.

*Note: CO2llageneer® is formulated at 2%.

*Note: CO2llageneer® should be heated to 40°C under stirring before using, to ensure good homogeneity of the product (crystals in suspensions).

*Note: CO2llageneer® can be pre-dispersed in a vegetable oil before addition to the oily phase.

*Note: The addition of an antioxidant would reinforce the stability of the formulation.
